Thin Solid Films 258 (1995) 355–359

thin solid films

Subject Index of Volume 258

Adhesion
adhesion and X-ray elastic constant evaluation of CrN coating 205
Alloys
oxidation behaviour of Cu–Ni(Mn) (constantan) films 252
resistance behaviour and interdiffusion of layered CuNi–NiCr films 236
Aluminium
formation of anodic alumina films in tungstate/ethylene glycol electrolyte 341
zirconocene-modified polysiloxane-2-pyridine coatings 174
Aluminium oxide
characterization of trimethylaluminum-N_2O–He glow discharge in plasma-enhanced chemical vapor deposition of aluminum oxide films 67
Amorphous materials
formation of anodic alumina films in tungstate/ethylene glycol electrolyte 341
high power deposition and analytics of amorphous silicon carbide films 14
interface properties of a-Si:H/a-SiC_x:H superlattice 132
rapid thermal processed thin films of reactively sputtered Ta_2O_5 230
X-ray photoelectron spectroscopy characterization of amorphous molybdenum oxysulfide thin films 110
Annealing
hydrogen and deuterium migration in annealed plasma-deposited silicon nitride films 1
thermal stability of pulsed laser deposited diamond-like carbon films 34
Anodic oxidation
formation of anodic alumina films in tungstate/ethylene glycol electrolyte 341
Atomic force microscopy
nanotribological characterization of hydrogenated carbon films by scanning probe microscopy 75
Auger electron spectroscopy
preparation of SiC films by solid state source evaporation 64

Band structure
activation energy of hopping conductivity in low-doped and low-compensated semiconductor films 347
Boron
surface segregation of boron atoms in Si and strained $Si_{1-x}Ge_x$ layers during MBE growth: experiment and simulation 137
Boron nitride
growth of boron nitride thin films by metal–organic chemical vapour deposition 21

Carbides
laser reactive ablation deposition of titanium carbide films 40
Carbon
influence of reactant gas composition on selected properties of N-doped hydrogenated amorphous carbon films 151
^{13}C nuclear magnetic resonance signals of Ge/C films deposited from tetraethylgermanium in an r.f. glow discharge 10
Ceramics
characteristics of Pt thin films on the conducting ceramics TiO and Ebonex (Ti_4O_7) as electrode materials 5
Chemical vapour deposition
characterization of trimethylaluminum-N_2O–He glow discharge in plasma-enhanced chemical vapor deposition of aluminum oxide films 67
effects of nitrogen trifluoride on the properties of plasma-enhanced chemical-vapor-deposited semi-insulating polysilicon films 292
growth of boron nitride thin films by metal–organic chemical vapour deposition 21
Chromium
study and improvement of the adhesion of chromium thin films deposited by magnetron sputtering 185
Coatings
adhesion and X-ray elastic constant evaluation of CrN coating 205
finite element analysis of the critical ratio of coating thickness to indentation depth for coating property measurements by nanoindentation 198
improving the passivating efficiency of conversion films on stainless steel by thermal treatment 194
nanotribological characterization of hydrogenated carbon films by scanning probe microscopy 75
study and improvement of the adhesion of chromium thin films deposited by magnetron sputtering 185
zirconocene-modified polysiloxane-2-pyridine coatings 174
Cobalt
in situ stress measurements of Co/Pd multilayer films using an optical non-contact displacement detector 128
Computer simulation
finite element analysis of the critical ratio of coating thickness to indentation depth for coating property measurements by nanoindentation 198
Conductivity
characteristics of Pt thin films on the conducting ceramics TiO and Ebonex (Ti_4O_7) as electrode materials 5
charge transport in thin films of molecular semiconductors as investigated by measurements of thermoelectric power and electrical conductivity 317
growth and characterization of polycrystalline InSe thin films 86
preparation and characterisation of poly[octyl 1,2-(2′,2″-dithienylacrylate)] thin films 325
Corrosion
improving the passivating efficiency of conversion films on stainless steel by thermal treatment 194

Elsevier Science S.A.

zirconocene-modified polysiloxane-2-pyridine coatings 174
Crystal orientation
effects of oxygen partial pressure on the microstructure and electrical properties of indium tin oxide film prepared by d.c. magnetron sputtering 274

Deposition process
composition monitoring method in $CuInSe_2$ thin film preparation 313
improving the passivating efficiency of conversion films on stainless steel by thermal treatment 194
laser reactive ablation deposition of titanium carbide films 40
low temperature synthesis of $Pb_{1-x}La_x(Zr_{1-y}Ti_y)_{1-x/4}O_3$ films pulsed laser deposition 82
modeling of the formation of RuO_2 thin films from $Ru(C_5H)_2$ by metal–organic chemical vapor decomposition 104
sputter ion plating of tungsten on CVD grown diamonds for laser thermal diffusivity measurement 46
thickness variation effects on X-ray scattering of multilayers 26
Depth profiling
oxidation behaviour of Cu–Ni(Mn) (constantan) films 252
resistance behaviour and interdiffusion of layered CuNi–NiCr films 236
Deuterium
hydrogen and deuterium migration in annealed plasma-deposited silicon nitride films 1
Diamond
microstructural modifications in diamond-like carbon thin films caused by high energy ion irradiation 123
sputter ion plating of tungsten on CVD grown diamonds for laser thermal diffusivity measurement 46
thermal stability of pulsed laser deposited diamond-like carbon films 34
Dielectric properties
low temperature synthesis of $Pb_{1-x}La_x(Zr_{1-y}Ti_y)_{1-x/4}O_3$ films pulsed laser deposition 82
optical properties of thin films up to second order in the thickness 213
preparation and characterisation of poly[octyl 1,2-(2′,2″-diethienylacrylate)] thin films 325
rapid thermal processed thin films of reactively sputtered Ta_2O_5 230
Dielectrics
structures of tantalum pentoxide thin films formed by reactive sputtering of Ta metal 56
Diffusion
concentration-dependent redistribution of arsenic in silicon during thermal oxidation 336
resistance behaviour and interdiffusion of layered CuNi–NiCr films 236
surface-plasmon-enhanced diffraction orders in polymer gratings 247

Electrical properties and measurements
charge transport in thin films of molecular semiconductors as investigated by measurements of thermoelectric power and electrical conductivity 317
growth and characterization of polycrystalline InSe thin films 86
indium tin oxide on InP by pulsed laser deposition 260
oxidation behaviour of Cu–Ni(Mn) (constantan) films 252
preparation and characterisation of poly[octyl 1,2-(2′,2″-diethienylacrylate)] thin films 325
rapid thermal processed thin films of reactively sputtered Ta_2O_5 230
resistance behaviour and interdiffusion of layered CuNi–NiCr films 236
sol–gel-derived tin oxide thin films 268
transient behaviour of thin film transistors based on nickel phthalocyanine 279
Electrochemistry
characteristics of Pt thin films on the conducting ceramics TiO and Ebonex (Ti_4O_7) as electrode materials 5
Electron microscopy
sol–gel-derived tin oxide thin films 268
Electronic devices
transient behaviour of thin film transistors based on nickel phthalocyanine 279
Ellipsometry
optical properties of thin films up to second order in the thickness 213
Epitaxy
epitaxial and thermal strains in oxidic thin films on Si(001) 264
the effect of a MgO seed layer on the biepitaxial growth of $Y_1Ba_2Cu_3O_{7-x}$ overlayers in various multilayered thin films 299

Field effect
transient behaviour of thin film transistors based on nickel phthalocyanine 279
Fluorescence
fast-ion-induced fluorescence from J aggregate of cyanine dye in Langmuir–Blodgett films 286
interlayer energy transfer between chromophoric carbazole and oxacyanine in Langmuir–Blodgett films: site selectivity of trapping 305

Germanium
^{13}C nuclear magnetic resonance signals of Ge/C films deposited from tetraethylgermanium in an r.f. glow discharge 10
Glow discharge
^{13}C nuclear magnetic resonance signals of Ge/C films deposited from tetraethylgermanium in an r.f. glow discharge 10
Glow discharge optical spectroscopy
high power deposition and analytics of amorphous silicon carbide films 14
Gold
microstructure of gold grown by ion-induced deposition 333
optical properties of thin films up to second order in the thickness 213
Graphite
thermal stability of pulsed laser deposited diamond-like carbon films 34
Growth mechanism
a quantitative model for the evolution from random orientation to a unique texture in PVD thin film growth 159
microstructure of gold grown by ion-induced deposition 333

Hardness
finite element analysis of the critical ratio of coating thickness to indentation depth for coating property measurements by nanoindentation 198
Hydrocarbons
nanotribological characterization of hydrogenated carbon films by scanning probe microscopy 75
Hydrogen
hydrogen and deuterium migration in annealed plasma-deposited silicon nitride films 1

Impurities
activation energy of hopping conductivity in low-doped and low-compensated semiconductor films 347

Indium
effects of oxygen partial pressure on the microstructure and electrical properties of indium tin oxide film prepared by d.c. magnetron sputtering 274
radiation damage in indium tin oxide (ITO) layers 283
Indium phosphide
indium tin oxide on InP by pulsed laser deposition 260
Infrared spectroscopy
growth of boron nitride thin films by metal–organic chemical vapour deposition 21
microstructural modifications in diamond-like carbon thin films caused by high energy ion irradiation 123
Interfaces
concentration-dependent redistribution of arsenic in silicon during thermal oxidation 336
interface properties of a-Si:H/a-SiC_x:H superlattice 132
Ion bombardment
fast-ion-induced fluorescence from J aggregate of cyanine dye in Langmuir–Blodgett films 286
microstructural modifications in diamond-like carbon thin films caused by high energy ion irradiation 123
microstructure of gold grown by ion-induced deposition 333
structure of TiN_x $(0 < x < 1.1)$ films prepared by ion beam-assisted deposition 51
Ion plating
a quantitative model for the evolution from random orientation to a unique texture in PVD thin film growth 159
experimental study of the growth evolution from random towards a (111) preferential orientation of PVD TiN coatings 170
sputter ion plating of tungsten on CVD grown diamonds for laser thermal diffusivity measurement 46

Langmuir–Blodgett films
fast-ion-induced fluorescence from J aggregate of cyanine dye in Langmuir–Blodgett films 286
interlayer energy transfer between chromophoric carbazole and oxacyanine in Langmuir–Blodgett films: site selectivity of trapping 305
Laser ablation
indium tin oxide on InP by pulsed laser deposition 260
laser reactive ablation deposition of titanium carbide films 40
Light scattering
attenuation, scattering, and absorption properties of light emitting planar waveguides 224
Luminescence
attenuation, scattering, and absorption properties of light emitting planar waveguides 224

Molecular beam epitaxy
surface segregation of boron atoms in Si and strained $Si_{1-x}Ge_x$ layers during MBE growth: experiment and simulation 137
Molybdenum
X-ray photoelectron spectroscopy characterization of amorphous molybdenum oxysulfide thin films 110
Multilayers
in situ stress measurements of Co/Pd multilayer films using an optical non-contact displacement detector 128
interlayer energy transfer between chromophoric carbazole and oxacyanine in Langmuir–Blodgett films: site selectivity of trapping 305
the effect of a MgO seed layer on the biepitaxial growth of $Y_1Ba_2Cu_3O_{7-x}$ overlayers in various multilayered thin films 299
thickness variation effects on X-ray scattering of multilayers 26

Nitrogen
influence of reactant gas composition on selected properties of N-doped hydrogenated amorphous carbon films 151
Nuclear magnetic resonance
^{13}C nuclear magnetic resonance signals of Ge/C films deposited from tetraethylgermanium in an r.f. glow discharge 10

Optical coatings
ion-beam sputtering of $(Ta_2O_5)_x$–$(SiO_2)_{1-x}$ composite thin films 91
Optical properties
attenuation, scattering, and absorption properties of light emitting planar waveguides 224
ion-beam sputtering of $(Ta_2O_5)_x$–$(SiO_2)_{1-x}$ composite thin films 91
optical properties of thin films up to second order in the thickness 213
sol–gel-derived tin oxide thin films 268
Optical spectroscopy
surface-plasmon-enhanced diffraction orders in polymer gratings 247
Organic substances
charge transport in thin films of molecular semiconductors as investigated by measurements of thermoelectric power and electrical conductivity 317
transient behaviour of thin film transistors based on nickel phthalocyanine 279
Organometallic vapour deposition
characterization of trimethylaluminum-N_2O–He glow discharge in plasma-enhanced chemical vapor deposition of aluminum oxide films 67
modeling of the formation of RuO_2 thin film from $Ru(C_5H_5)_2$ by metal–organic chemical vapor decomposition 104
Oxidation
concentration-dependent redistribution of arsenic in silicon during thermal oxidation 336
Oxides
epitaxial and thermal strains in oxidic thin films on Si(001) 264
modeling of the formation of RuO_2 thin film from $Ru(C_5H_5)_2$ by metal–organic chemical vapor decomposition 104
structures of tantalum pentoxide thin films formed by reactive sputtering of Ta metal 56
Oxygen
effects of oxygen partial pressure on the microstructure and electrical properties of indium tin oxide film prepared by d.c. magnetron sputtering 274
whisker growth on sputtered AlSn (20 wt.% Sn) films 115

Photovoltage
indium tin oxide on InP by pulsed laser deposition 260
Physical vapour deposition
a quantitative model for the evolution from random orientation to a unique texture in PVD thin film growth 159
adhesion and X-ray elastic constant evaluation of CrN coating 205
composition monitoring method in $CuInSe_2$ thin film preparation 313
experimental study of the growth evolution from random towards a (111) preferential orientation of PVD TiN coatings 170
preparation of SiC films by solid state source evaporation 64
study and improvement of the adhesion of chromium thin films deposited by magnetron sputtering 185

Plasma processing and deposition
characterization of trimethylaluminum-N_2O–He glow discharge in plasma-enhanced chemical vapor deposition of aluminum oxide films 67
effects of nitrogen trifluoride on the properties of plasma-enhanced chemical-vapor-deposited semi-insulating polysilicon films 292
high power deposition and analytics of amorphous silicon carbide films 14
hydrogen and deuterium migration in annealed plasma-deposited silicon nitride films 1
influence of reactant gas composition on selected properties of N-doped hydrogenated amorphous carbon films 151
Platinum
characteristics of Pt thin films on the conducting ceramics TiO and Ebonex (Ti_4O_7) as electrode materials 5
Polymers
effects of nitrogen trifluoride on the properties of plasma-enhanced chemical-vapor-deposited semi-insulating polysilicon films 292
preparation and characterisation of poly[octyl 1,2-(2′,2″-diethienylacrylate)] thin films 325
XPS and AES characterization of SiN_x:H layers deposited by PECVD on Parylene C. Effects of thermal treatments on Parylene C surfaces and Parylene C/SiN_x:H interlayers 143
Pulsed laser deposition
thermal stability of pulsed laser deposited diamond-like carbon films 34

Quantum effects
activation energy of hopping conductivity in low-doped and low-compensated semiconductor films 347

Radiation damage
fast-ion-induced fluorescence from J aggregate of cyanine dye in Langmuir–Blodgett films 286
radiation damage in indium tin oxide (ITO) layers 283
Raman scattering
microstructural modifications in diamond-like carbon thin films caused by high energy ion irradiation 123
Resistivity
influence of reactant gas composition on selected properties of N-doped hydrogenated amorphous carbon films 151
Ruthenium
modeling of the formation of RuO_2 thin film from $Ru(C_5H_5)_2$ by metal–organic chemical vapor decomposition 104
Rutherford backscattering spectrometry
structure of TiN_x $(0 < x < 1.1)$ films prepared by ion beam-assisted deposition 51
Rutherford backscattering spectroscopy
concentration-dependent redistribution of arsenic in silicon during thermal oxidation 336

Scanning electron microscopy
growth of boron nitride thin films by metal–organic chemical vapour deposition 21
Segregation
surface segregation of boron atoms in Si and strained $Si_{1-x}Ge_x$ layers during MBE growth: experiment and simulation 137
Semiconductors
activation energy of hopping conductivity in low-doped and low-compensated semiconductor films 347
charge transport in thin films of molecular semiconductors as investigated by measurements of thermoelectric power and electrical conductivity 317
composition monitoring method in $CuInSe_2$ thin film preparation 313
effects of nitrogen trifluoride on the properties of plasma-enhanced chemical-vapor-deposited semi-insulating polysilicon films 292
radiation damage in indium tin oxide (ITO) layers 283
Silane
zirconocene-modified polysiloxane-2-pyridine coatings 174
Silicon
epitaxial and thermal strains in oxidic thin films on Si(001) 264
surface segregation of boron atoms in Si and strained $Si_{1-x}Ge_x$ layers during MBE growth: experiment and simulation 137
Silicon carbide
high power deposition and analytics of amorphous silicon carbide films 14
interface properties of a-Si:H/a-SiC_x:H superlattice 132
preparation of SiC films by solid state source evaporation 64
Silicon nitride
XPS and AES characterization of SiN_x:H layers deposited by PECVD on Parylene C. Effects of thermal treatments on Parylene C surfaces and Parylene C/SiN_x:H interlayers 143
Solar cells
composition monitoring method in $CuInSe_2$ thin film preparation 313
Sputtering
in situ stress measurements of Co/Pd multilayer films using an optical non-contact displacement detector 128
ion-beam sputtering of $(Ta_2O_5)_x$–$(SiO_2)_{1-x}$ composite thin films 91
rapid thermal processed thin films of reactively sputtered Ta_2O_5 230
whisker growth on sputtered AlSn (20 wt.% Sn) films 115
Steel
improving the passivating efficiency of conversion films on stainless steel by thermal treatment 194
Stress
in situ stress measurements of Co/Pd multilayer films using an optical non-contact displacement detector 128
ion-beam sputtering of $(Ta_2O_5)_x$–$(SiO_2)_{1-x}$ composite thin films 91
study and improvement of the adhesion of chromium thin films deposited by magnetron sputtering 185
Structural properties
structures of tantalum pentoxide thin films formed by reactive sputtering of Ta metal 56
Superconductivity
the effect of a MgO seed layer on the biepitaxial growth of $Y_1Ba_2Cu_3O_{7-x}$ overlayers in various multilayered thin films 299
Superlattices
interface properties of a-Si:H/a-SiC_x:H superlattice 132
Surface and interface states
XPS and AES characterization of SiN_x:H layers deposited by PECVD on Parylene C. Effects of thermal treatments on Parylene C surfaces and Parylene C/SiN_x:H interlayers 143
Surface morphology
interlayer energy transfer between chromophoric carbazole and oxacyanine in Langmuir–Blodgett films: site selectivity of trapping 305
Surface plasmons
surface-plasmon-enhanced diffraction orders in polymer gratings 247
Surface structure
X-ray photoelectron spectroscopy characterization of amorphous molybdenum oxysulfide thin films 110

Tantalum
structures of tantalum pentoxide thin films formed by reactive sputtering of Ta metal 56
Thermal desorption
epitaxial and thermal strains in oxidic thin films on Si(001) 264
Thermionic emission
growth and characterization of polycrystalline InSe thin films 86
Tin oxide
radiation damage in indium tin oxide (ITO) layers 283
sol–gel-derived tin oxide thin films 268
Titanium carbide
laser reactive ablation deposition of titanium carbide films 40
Titanium nitride
a quantitative model for the evolution from random orientation to a unique texture in PVD thin film growth 159
experimental study of the growth evolution from random towards a (111) preferential orientation of PVD TiN coatings 170
structure of TiN_x $(0 < x < 1.1)$ films prepared by ion beam-assisted deposition 51
Transmission electron microscopy
microstructure of gold grown by ion-induced deposition 333
Tribology
nanotribological characterization of hydrogenated carbon films by scanning probe microscopy 75
Tungsten
sputter ion plating of tungsten on CVD grown diamonds for laser thermal diffusivity measurement 46
Tunnelling
growth and characterization of polycrystalline InSe thin films 86

Vacancies
effects of oxygen partial pressure on the microstructure and electrical properties of indium tin oxide film prepared by d.c. magnetron sputtering 274

Whiskers
whisker growth on sputtered AlSn (20 wt.% Sn) films 115

X-ray diffraction
adhesion and X-ray elastic constant evaluation of CrN coating 205
experimental study of the growth evolution from random towards a (111) preferential orientation of PVD TiN coatings 170
preparation of SiC films by solid state source evaporation 64
the effect of a MgO seed layer on the biepitaxial growth of $Y_1Ba_2Cu_3O_{7-x}$ overlayers in various multilayered thin films 299
X-ray photoelectron spectroscopy
X-ray photoelectron spectroscopy characterization of amorphous molybdenum oxysulfide thin films 110
XPS and AES characterization of SiN_x:H layers deposited by PECVD on Parylene C. Effects of thermal treatments on Parylene C surfaces and Parylene C/SiN_x:H interlayers 143
X-ray scattering
thickness variation effects on X-ray scattering of multilayers 26
